

DATASHEET
For Research Use Only

NAME	VeroE6-ACE2
CATALOGUE NUMBER	101001
DESCRIPTION	The VeroE6 cell line has been transduced to express human ACE2 and selected under hygromycin B. This cell line is not derived from a clone but is a pool of hygromycin B resistant cells. The resulting VeroE6-ACE2 cells are highly susceptible to SARS-CoV-2 infection.
SPECIES/TYPE	<i>Chlorocebus aethiops</i> - Grivet monkey. Transfer outside of the UK is subject to CITES regulations.
CULTURE MEDIUM	DMEM, 90% Foetal calf serum, 10% 2mM Glutamine 200 µg/ml Hygromycin B 100 Units Penicillin and 100ug Streptomycin/ml (Optional) We recommend to recover the cells in one T25 flask. Note that the viability post thaw is low, however, the cells reach confluency 2-3 days post thaw and then grow as expected.
STORAGE	Liquid nitrogen vapour
DEPOSITOR	Prof. Arvind Patel, The MRC-University of Glasgow Centre for Virus Research, The University of Glasgow. .
REFERENCE	Rihn <i>et al.</i> A plasmid DNA-launched SARS-CoV-2 reverse genetics system and coronavirus toolkit for COVID-19 research. PLOS Biology, 2021. https://journals.plos.org/plosbiology/article?id=10.1371/journal.pbio.3001091
ACKNOWLEDGEMENTS	The acknowledgment should read: "The [<i>Insert reagent name</i>] was provided by the NIBSC Research Reagent Repository, UK. With thanks to [<i>Insert Depositor</i>]."

Please also ensure that you send us a copy of any papers resulting from work using reagents acquired through CFAR, this can be by e-mail or printed copy.

MATERIAL SAFETY SHEET

Physical properties (at room temperature)			
Physical appearance	Yellow/Pink, liquid		
Fire hazard	None		
Chemical properties			
Stable	Yes	Corrosive:	No
Hygroscopic	No	Oxidising:	No
Flammable	No	Irritant:	No
Other: This product is a cell line; It is the responsibility of the end user to seek local biosafety approval for the storage and handling of the material in their workplace			
Handling: CAUTION - This preparation is not for administration to humans or animals in the human food chain. As with all materials of biological origin, this preparation should be regarded as potentially hazardous to health. It should be used and discarded according to your own laboratory's safety procedures. Such safety procedures should include the wearing of protective gloves and avoiding the generation of aerosols.			
Toxicological properties			
Effects of inhalation:	Not established, avoid inhalation		
Effects of ingestion:	Not established, avoid ingestion		
Effects of skin absorption:	Not established, avoid contact with skin		
Suggested First Aid			
Inhalation	Seek medical advice		
Ingestion	Seek medical advice		
Contact with eyes	Wash with copious amounts of water. Seek medical advice.		
Contact with skin	Wash thoroughly with water.		
Action on Spillage and Method of Disposal			
Spillage of vial contents should be taken up with absorbent material wetted with a suitable disinfectant. Rinse area with a virucidal agent followed by water.			
Absorbent materials used to treat spillage should be treated as biologically hazardous waste.
