

The activities of 9F3 in immunoblot, ELISA and protection in mice has been reported in: Sato H and Sato Y. (1990) Protective activities in mice of

Infect. and Immun. 58, 3369 - 3374, and Sato, H., Sato, Y. and Ohishi, I.

(1991) Comparison of pertussis toxin (PT)-neutralizing activities and mouse protective activities of anti-PT mouse monoclonal antibodies. Infect. Immun.

Grateful acknowledgements are due to Dr H. Sato, The National Institute of

Infectious Diseases, Tokyo, Japan., for the kind donation of the hybridoma

Non WHO Reference Material Anti-PT S4 Subunit Monoclonal Antibody 9F3 NIBSC code: 99/560 Instructions for use (Version 5.0, Dated 18/05/2015)

This material is not for in vitro diagnostic use.

1. INTENDED USE

Material 9F3 is a monoclonal antibody which reacts to pertussis toxin S4 subunit. The hybridoma cell line for the production of the monoclonal antibody was established by Drs H. Sato and Y. Sato, The National Institute of Infectious Diseases , Tokyo, Japan.

It is for use as a research reagent to characterise pertussis toxin.

2. CAUTION

This preparation is not for administration to humans or animals in the human food chain.

The material is not of human or bovine origin. As with all materials of biological origin, this preparation should be regarded as potentially hazardous to health. It should be used and discarded according to your own laboratory's safety procedures. Such safety procedures should include the wearing of protective gloves and avoiding the generation of aerosols. Care should be exercised in opening ampoules or vials, to avoid cuts.

3. UNITAGE

No unitage is assigned to this material

4. CONTENTS

Country of origin of biological material: United Kingdom.

Each vial contains 400 μ l of frozen material from mouse ascitic fluid. The monoclonal antibody was prepared from pristane-treated mice after intraperitoneal injection with cells of the hybridoma cell line 9F3. The ascitic fluid was diluted 1/25 in PBS containing 1% normal mouse serum. This solution was dispensed in 400 μ l aliquots into vials, coded 99/560 and stored at -20°C in the dark.

5. STORAGE

It is recommended that unopened vials, aliquots and diluted material, not for immediate use, are stored at -20° C or lower.

6. DIRECTIONS FOR OPENING

Vials have a screw cap; an internal stopper may also be present. The cap should be removed by turning anti-clockwise. Care should be taken to prevent loss of the contents. Please note: If a stopper is present on removal of the cap, the stopper should remain in the vial or be removed with the cap.

7. USE OF MATERIAL

A suggested dilution of approximately 1/500 of this solution is recommended for the initial dilution on the ELISA plate. However, this may vary with individual laboratories.

Repeated freeze thawing should be avoided. The vials contain no

bacteriostat and the preparation should not be asumed as sterile.

8. STABILITY

Reference materials are held at NIBSC within assured, temperaturecontrolled storage facilities. Reference Materials should be stored on receipt as indicated on the label. They remain valid with the assigned potency and status until withdrawn or amended.

Users who have any data supporting any change in the characteristics of this material are encouraged to contact NIBSC.

monoclonal antibodies against pertussis toxin.

In all publications, including data sheets, in which this material is referenced, it is important that the preparation's title, its status, the NIBSC code number, and the name and address of NIBSC are cited and cited correctly.

14. MATERIAL SAFETY SHEET

Classification in accordance with Directive 2000/54/EC, Regulation (EC) No 1272/2008: Not applicable or not classified

Physical and Chemical properties		
Physical	Corrosive:	No
appearance: Liquid		
Stable:	Oxidising:	No
Yes		
Hygroscopic:	Irritant:	No
No		
Flammable:	Handling:	See caution, Section 2
No		
Other (specify): Contains material of mouse origin		
Toxicological properties		
Effects of inhalation: Not established, avoid inhalation		
Effects of ingestion: Not established, avoid ingestion		
Effects of skin absorption: Not established, avoid contact with skin		
Suggested First Aid		
Inhalation: Seek medical advice		
Ingestion: Seek medical advice		

Contact with eyes: Wash with copious amounts of water. Seek medical advice Contact with skin: Wash thoroughly with water.

Action on Spillage and Method of Disposal

Spillage of vial contents should be taken up with absorbent material wetted with an appropriate disinfectant. Rinse area with an appropriate disinfectant followed by water.

Absorbent materials used to treat spillage should be treated as biological waste.

15. LIABILITY AND LOSS

In the event that this document is translated into another language, the English language version shall prevail in the event of any inconsistencies between the documents.

Unless expressly stated otherwise by NIBSC, NIBSC's Standard Terms and Conditions for the Supply of Materials (available at http://www.nibsc.org/About_Us/Terms_and_Conditions.aspx or upon request by the Recipient) ("Conditions") apply to the exclusion of all other terms and are hereby incorporated into this document by reference. The Recipient's attention is drawn in particular to the provisions of clause 11 of the Conditions.

16. INFORMATION FOR CUSTOMS USE ONLY

Country of origin for customs purposes*: United Kingdom * Defined as the country where the goods have been produced and/or sufficiently processed to be classed as originating from the country of supply, for example a change of state such as freeze-drying. Net weight: 0.4g

Toxicity Statement: Non-toxic

Veterinary certificate or other statement if applicable. Attached: No
